**GUSTO**  
GLOBAL INDUSTRIES

GOOD DESIGN AWARD WINNER

**GUSTO DUST REDUCTION SYSTEM**

- Self-draining
- Not submersible
- Powered by 12-14v
- UV protected plastic
- Compact and sleek design
- Water resistant (ip 68 rated)
- Available in black and white
- Energy efficient and reliable
- 200watt power consumption
- Mounts to the side of a caravan
- Patented and registered design
- Australian owned and designed
- Operates when the van is stationary
- Able to pressurise a caravan in seconds
- Creates more roof space for solar panels
- Engineered for functionality and aesthetics
- Once installed, the device is concealed from user
- Also operates when the van is travelling in excess of 100km/h
- Compact design allows for fitment inside standard internal cabinet
- Fan can move a maximum air volume of 1800 cubic meters per hour
- Operating temperature between negative 40 and positive 105 celsius
- Eliminates requirements for structural reinforcing and extensive waterproofing

EXTERNAL UNIT AND INTERNAL PANEL

[www.gustoglobalindustries.com](http://www.gustoglobalindustries.com)

A DRS that mounts to either side of your caravan and can pressurise a caravan in seconds.

The patented and compact design allows the Gusto Dust Reduction System (DRS) to be mounted to either side of your caravan, leaving more space on your roof for those precious solar panels. This also eliminates requirements for structural reinforcing and extensive waterproofing.

It has been engineered for functionality and aesthetics, delivering an exceptional user experience. Powered by 12-14v, Gusto DRS is energy efficient and reliable.

The compact and sleek design allows for fitment inside a standard internal cabinet. This makes the system aesthetically pleasing both outside and inside the van.

The DRS is able to pressurise a caravan in seconds, both when stationary and on the move, the Gusto DRS will keep dust where it belongs – outside!

**Australian owned and patented and registered design.**
